PROFESSIONAL SUMMARY

AI & GenAI Engineer with a strong foundation in Computer Science (AI & Data Science, CGPA 8.4). Specialized in architecting agentic AI systems, production RAG pipelines, microservice backends, and applied machine learning models. Focused on engineering autonomous pipelines that decide, reason, and act with rigorous reliability under real-world constraints.

EDUCATION

Audisankara Institute of Technology — Gudur, AP	2021 – 2025
<i>Bachelor of Technology: Computer Science & Engineering (AI & Data Science) — CGPA: 8.4 / 10</i>	
B S R Junior College — Higher Secondary (Class XII, MPC)	2019 – 2021
Zilla Parishad High School — Secondary School Certificate (Class X)	Passed 2019

WORK EXPERIENCE

Syncs Group — AI/ML Intern	2026
- Contributed to the development of scalable AI systems and end-to-end applied machine learning architectures. - Engineered automated data ingestion and preprocessing pipelines for high-throughput operational intelligence. - Collaborated on microservice integration and API contract optimization to streamline inference latency.	
TeckyBot — AI Intern	Jan 2025 – Mar 2025
- Engineered predictive and classification models using scikit-learn and neural network pipelines for structured datasets. - Implemented Generative AI conversational flows and prompt orchestration workflows for automated customer query resolution. - Performed data cleaning, exploratory data analysis, and feature engineering to enhance model accuracy and robustness.	

KEY TECHNICAL PROJECTS

Dynamic Pricing Intelligence Platform FastAPI, Playwright, Scikit-learn, OpenRouter Vision/LLM, PostgreSQL, Docker	github.com/devendrareddy2344/Dynamic_Pr icing...
- Built an autonomous microservice platform evaluating competitive market viability through multi-channel stealth web extraction. - Implemented DBSCAN & KMeans clustering algorithms in scikit-learn to isolate optimal market price points and elasticity metrics. - Connected multimodal OpenRouter vision and LLM models to generate actionable strategic analysis from live e-commerce streams.	
AI Clinical Trial Eligibility & Contradiction Engine Clinical BERT, Sentence Transformers, FAISS, Mem0, FastAPI	github.com/devendrareddy2344/AI_Clinical_ Trials
- Designed an automated clinical decision engine parsing trial protocol PDFs and validating patient eligibility contraindications. - Integrated Clinical BERT and MPNet embeddings with FAISS vector indexing to semantically evaluate exclusion criteria. - Integrated Mem0 AI memory layer to surface silent exclusion contradictions across historical patient lab panels (e.g. eGFR thresholds).	
Enterprise SOP & Policy Knowledge Assistant (RAG System) FastAPI, Streamlit, FAISS, OpenAI GPT-3.5, RBAC	github.com/devendrareddy2344/Enterprise-S OP...
- Developed an enterprise-grade RAG pipeline enforcing strict microservice separation between Streamlit UI and FastAPI backend. - Implemented document ingestion, chunk-level FAISS vector indexing, and Role-Based Access Control (RBAC) filtering. - Engineered grounded prompt orchestration to strictly eliminate hallucination, recording audit metrics to CSV for compliance.	

TECHNICAL SKILLS

- GenAI & LLMs:** LangChain, LangGraph, RAG Pipelines, Prompt Engineering, OpenAI GPT models, Azure OpenAI, Gemini
- Machine Learning & NLP:** PyTorch, TensorFlow, Keras, Hugging Face, BERT, Scikit-Learn, OpenCV, Statistical Modeling

- **Backend & Data:** Python, FastAPI, Django, FAISS, ChromaDB, PostgreSQL, Redis, TimescaleDB, Docker, REST APIs
- **Frontend & Tooling:** React, Next.js, TypeScript, Streamlit, Git, GitHub, Linux, Vercel, Render
- **Focus Areas & Upskilling:** Agentic Swarm Orchestration, Evasion Scraping, Distributed Vector Search, Low-Latency Inference
